

TIPL80A (0-80cm) Active Reader

OVERVIEW

TimeWatch presents an Active Readers that are very much useful in different locations and different sectors of security. Long Range Readers can easily detect upto 80cm range. It is easy and hand-free security solutions for education and traffic, and parking system. This technological invention save lots of time and provides proper security. This reader help you get the accurate attendance records of each student and you can track it on a real-time basis whenever you want. It is mainly implement in school solution to read the multiple cards at a time while the students get enter into school premises. It is the best reader which can integrate with Biometric Machine to give you the proper solution of students attendance.

TECHNICAL FEATURES

- *RF Power: 0~31dBm adjustable*
- *Sensitivity: -80dBm(12dBi antenna more than 12 m)*
- *Read Speed: Multi tag 50pcs/second, single tag 1000 times/minute*
- *Data Interface: 100M Ethernet interface RS232/RS485 interface Wiegand 26/34 ,one team Relay*
- *Power Supply: DC+9V~+15V*
- *Working Temp.: -20~60 °C*
